Objective

Full Stack Developer with 4+ years of experience in architecting scalable AI-driven automation tools and high-performance React applications. Proven track record of delivering enterprise-grade solutions with 4M+ global users. Expert in full-stack JavaScript environments and Google Cloud ecosystems.

WORK EXPERIENCE

CloudFort Technologies & Consultancy

Full Stack Developer | Google Apps Script Developer

March 2021 - Present

- Architected and maintained responsive web applications using **HTML, CSS, JavaScript, React.js, and Redux**, contributing to a **25–30%** increase in user engagement and satisfaction.
- Integrated **RESTful APIs** and third-party services to streamline data flow between front-end and back-end systems, leading to a 30% improvement in response times.
- Led **cross-functional** initiatives with product and design teams to implement new features, helping reduce the average project delivery time by 15%.
- Streamlined version control and team collaboration through **Git/GitHub** workflows, cutting merge conflicts by 50% and improving code review turnaround.
- **Automated** repetitive internal processes using **Google Apps Script**, resulting in time savings of 150+ hours per quarter across teams.
- Proactively identified and resolved bugs and performance issues, reduced post-release defects by 40% through rigorous code reviews and automated testing, maintaining 99.9% system availability.

EDUCATION

Integral University

B.TECH in Computer Science & Engineering - 7.86

July 2016 - Aug 2020

SKILLS

- Frontend: HTML5, CSS3, React.js, JavaScript(ES6+), Redux, TypeScript, Next.js, Tailwind CSS, ShadCN
- Backend: Node.js, RESTful APIs, Express.js, MongoDB, Firestore
- Other Skills: Git/GitHub, AI tools, Gen AI/Generative AI integrations, Automation, Google Apps Script, Google Cloud Platform, Macros, Google Workspace APIs, JSON, OAuth2, Web Apps, Agile Development, Performance Optimization, Debugging, Leadership

PROJECTS

Gemini AI magic in Sheets, Docs and Forms [🔗](#)

A **Generative AI** assistant that automates content creation and enhances productivity in Google Workspace tools.

- Built AI integrations using **Google Apps Script, Gen AI, and CLASP**, reducing manual effort in data processing by **50%**.
- Achieved **4+ million downloads** and received **300+ reviews** on the **Google Workspace Marketplace**, demonstrating strong adoption and positive user feedback.
- Leveraged **Generative AI** to improve document accuracy, automate content generation, and enhance task management within enterprise environments.
- Technologies used: **React.js, Redux, Google Apps Script, Gen AI, Google Cloud Platform, Clasp, Tailwind, ShadCN.**

Smart Certificates [🔗](#)

The **Smart Certificates** add-on is a productivity tool for Google Workspace designed to automate the creation, delivery, and management of digital certificates. It integrates directly with **Google Forms**, using **Google Slides** as a template engine to generate personalized certificates (in PDF or Image format) based on form responses or quiz scores.

- **Engineered a high-scale document automation pipeline** using **Google Apps Script** and **REST APIs** to integrate Google Forms, Slides, and Gmail, enabling the automated generation and delivery of personalized certificates for **130,000+ users** with a 99.9% success rate.
- Technologies used: **React.js, ShadCN, Tailwind CSS, Google Console Project, Google Workspace APIs, Google Apps Script, JavaScript, Clasp library, and OAuth 2.0.**

LeadClose.ai

LeadClose.ai is a voice-first WhatsApp marketing and sales automation platform designed to bridge the gap between text-based chat and human-like voice interactions. It leverages the official WhatsApp Business API to allow businesses to conduct voice calls, deploy AI-driven voice agents for lead qualification, and manage customer relations through a centralized team inbox.

- Contributed to the engineering of a cutting-edge WhatsApp Sales CRM, orchestrating Next.js and Node.js to deploy AI-driven Voice Agents that autonomously qualify leads via real-time Speech-to-Text (STT) and Natural Language Processing (NLP).
- Technologies used: **Next.js, Node.js, ShadCN, Tailwind, WhatsApp Business API, Gemini APIs, and Gen AI.**

AdminPlus - Google Workspace Management Platform

Simplifies and automates Google Workspace administration through a centralized console for managing users, services, and security.

- Developed and deployed core modules using **React.js, Material UI, Redux, and Node.js**, improving admin workflow efficiency by **40%**.
- Integrated **Google Workspace APIs** and **Google Datastore**, reducing manual admin tasks by **60%** through real-time automation.
- Enhanced dashboard performance by optimizing component rendering, cutting load times by **35%**.
